Product Statement and Care Guide

Product Warranty

All Icon Design products are warranted to the original purchaser for one year from the purchase date against all defects in material and workmanships.

Warranty does not apply to material provided by the customer, damage as a result of installation, misuse, alteration, normal wear and tear, weather, or shipping damages.

Product Statement

Icon Design furniture is built with the highest quality materials and an extraordinary team of skilled artisans and craftsman. Solids and veneers are hand selected for appearance of grain, figure and durability over time. The ability to select and press our own veneers in-house gives the Icon Design team boundless ability to execute the world-renowned designs only available from Icon Design.

Icon Design finishes are custom formulated using the finest grades of dye stains, toners, sealers and topcoats to provide a finish with outstanding clarity, depth, and durability. Icon Design finish coatings range from catalyzed high performance, high solids lacquers for standard traditional open and semi pore finishes to more exotic urethane and polyester coatings for the high gloss, polished closed pore wood and/or opaque finishes.

Our metal hardware and furnishings have been selected not only as a component of design but to offer functionality that pleases the senses of touch look and feel, crafted from durable nickel, stainless steel, aluminum, copper, and brass and wood.

Recommended Care Instructions

Do not place hot or wet objects directly on the furniture surface.
Excessive dampness, dryness, heat, or cold can damage wood furniture. An Ambient of 45-55% relative humidity is recommended. Direct sunlight may change the color. Rubber or plastic mats should not be used unless marked safe for wood. Rubber or plastic may soften and stain the finish. Wipe up all spills immediately to prevent spots that require refinishing. To minimize physical damage to the furniture, use coasters, tablecloths, and hot pads.

Do not clean any product with ammonia-based products such as ammonia-based glass cleaner.
This will result in a permanent stain and could ruin the finish especially wood finishes and gold/silver leaf applications. For cleaning glass we recommend automotive glass cleaners that do not contain ammonia and will not harm the furniture. When using glass cleaners on glass and wood pieces, apply the glass cleaner in moderation to avoid dripping and running onto the wood portion of your piece.

Product Statement and Care Guide

Open Grain Wood Finishes

To care for wood finishes use a soft, lint free, white cotton cloth always wiping in the direction of the wood grain. To remove fingerprints use a damp, soft, lint free white cotton cloth. (You may use a diluted dish detergent of 2 small drops of detergent per cup of water). If you choose to use this solution, it must be followed by wiping with a dry soft, lint free white cotton cloth wiping in the direction of the grain. All moisture must be removed from the surface to ensure a quality, damage-free cleaning.

Icon Design wood finishes are achieved using a premium high performance catalyzed lacquer finish that is designed to resist staining and wear. Do not apply wood polishes, waxes, oils to the wood finishes. These types of cleaners will cause clouding of the finish. Please follow cleaning instructions carefully to preserve the beauty of the wood piece.

Gold and Silver Leaf

Gold and silver gilded pieces are coated with a protective coating allowing for light dusting and cleaning with damp, soft, lint free white cotton cloth. Gold and silver leaf applications are very thin and only require a very light pressure to remove dust. Never spray cleaner directly on gold and silver leaf. When cleaning a mirror that has gold or silver leafed frame use an automotive glass cleaner containing no ammonia.

Opaque, Clear High Gloss and Polished Finishes

Icon Design high gloss and polished lacquer, urethane and polyester pieces are coated with technically advanced coatings that offer very high performance protection and unsurpassed beauty, clarity, and depth of color and gloss. Do not use wax, wood polishes, ammonia based cleaner, or oils on these surfaces. To remove dust and light fingerprints use light pressure with a damp, soft cloth followed by a soft dry cloth. It is important to make sure all moisture is wiped from the surface of the piece. We recommend “Micromesh” or “Microfiber” cloths that can be purchased at automotive retail stores.

Hardware

All Icon Design pieces are leveled and have had their doors and drawers adjusted for proper fit, alignment, and function. To clean hardware use a damp soft cloth followed by a dry soft cloth with a minimal amount of pressure. Repeat as need to remove all moisture from the hardware.
